CHAPTER V

CONCLUSION, LIMITATION, RECOMMENDATION, AND
PEDAGOGICAL IMPLICATION

In this chapter, the researcher will explain the conclusion and pedagogical implication. In the conclusion will be summarized the finding of this research which has been done. In limitation and recommendation part will be explain research boundaries and what needs to be done for further research that may not have been done in this study, while the pedagogical implication will be used as consideration for the lecturers, students and also other researchers who want to use Grammarly checker.

5.1 Conclusion

The use of Grammarly could be effective to raise students’ metalinguistic awareness in L2 Writing. The result reveals that English department students of third at IAIN Kendari semester were assisted in their drafting process and did some progress especially for Grammar after using Grammarly that can be seen from how Grammarly works in their draft and benefits of it. Ultimately, it can be proof that Grammarly is a medium that can raise students’ metalinguistic awareness in L2 Writing.

5.2 Limitation of the Study

This study conducted only with the samples of population, they are from A class English education Department students. In Participant selection, the students who are experienced by Grammarly app are necessary for this research because
the researcher focuses on Grammarly in raising students’ metalinguistic awareness in L2 Writing.

Regarding to the limitation of this study, the researcher only focused on students’ metalinguistic awareness in terms of syntax or Grammar, recalling the issue associated with this research that students fail to correct errors not because they lack grammatical knowledge but because they cannot detect the errors (Lee, 1997). Whereas, there are still some metalinguistic awareness features besides syntax such as phonology, morphology, semantic and pragmatic that make it possible for future researchers to study with more big scale is better.

As for the obstacles that I experienced when researching is the change of instruments. Initially the researcher wanted to conduct the interview with students to obtain deeper data but it is impossible to be done due to time and conditions that did not allow at that time made the researcher and also the supervisor agreed to change the interview instrument with a questionnaire that was administered via Google Form. Despite there are so many changes but did not reduce the quality of this research.

5.3 Recommendation

In this part, the researcher recommends the further researcher to research on a broader scale, both within the scope of the English department or in other fields. This research explores Grammarly information, specifically free Grammarly. Subsequent researchers might be able to begin researching not only on free Grammarly but also premium Grammarly to add information as well as new references for future researchers who are interested in this research.
This research raises the title of Grammarly which focuses on students' metalinguistic awareness in syntax/ Grammar feature. In fact, there are several features in metalinguistic awareness besides Syntax. Therefore, the next researcher can take this opportunity to focus on metalinguistic awareness in other features with the different design and approach of the study.

5.4 Pedagogical Implication

The result of this research could be a contribution to the English lecturer, students and future researcher. The lecturer can use this application in teaching English especially for Writing. Whenever the lecturer being overwhelmed in correcting students’ errors in writing, they can use this application to relieve their work practically.

This study is expected to help the students also to fix languages error in their writing and can motivate the students to learn grammar, spelling, and punctuation in writing by using Grammarly checker. It offers a great way for writers to correct their writing and it also shows the way to correct. They can learn independently to raise their metalinguistic awareness.

For the future researchers, this research can be an inspiration to other researchers in order to develop Grammarly checker in another case. This research also can be used as a reference to support some sources that necessary for them. Moreover, the researcher suggested to the future researchers to conduct some research with different design and approach of the study.

Appendix 1: Sample of Students’ drafts Corrected by Grammarly
The first strategy to improve speaking skill is talking to yourself. If we want to have a good speaking skill, we should often talk to a lot. Some of people can become so nervous to speak in front of other people. They can forget what they want to speak, or they feel afraid if they make a mistake. By talking to yourself, we can feel free to speak whatever we want, although we need more time to check the word in our dictionary. There is no other people who will hear or criticise you if you make a mistake. You can start with saying simple sentences that are related with your action, such as ‘I am hungry, and I want to cook delicious food.’

Second, singing can help us to improve speaking skill. A song has easy or daily words as the lyric. We can take some words to use in our daily from the lyric. Not just the words, we also can hear how the words pronounces, and we can repeat it. Indirectly, we are doing exercise to improve our speaking skill. It is one of the fun ways because song has beautiful and enjoyable tones that can makes us happy to hear it repeatedly, and imitate the words. It can helps us to have a good intonation when we speak.

The last strategy is read aloud. When we do not know what we want to speak to ourselves, or we do not have a good song to listen, we can try to look for an article or a video with English subtitle. To have a good speaking skill, we need to pronounce the words correctly, so people can
To have a good speaking skill, we need to pronounce the words correctly, so people can understand what we are talking about. Read aloud can give us a chance to check how good our pronunciation is. Whether we have been able to pronounce all the words that we read. It can help us to enrich our vocabulary and gives us many ideas about something which we can use it when we speak.

There are many strategies that we use for improving our speaking skill. We just need to look for strategies that are the most suitable with us and easier for us. From many strategies, there are three strategies that you can try such as talking to yourself, singing, and read aloud. We can compound some strategies together to make it more interesting and not boring for us.
Appendix 2: Sample of Students' Reflection

Jawaban :
   Ya, saya terkadang mengalami kesulitan saat menggunakan Grammarly.
   Kesulitan tersebut adalah masalah jaringan dikarenakan saya tidak mempunyai jaringan internet yang cukup baik dan aplikasi ini harus digunakan di notebook atau laptop jadi terkadang meminta bantuan kepada teman untuk mengeceknya di laptop mereka.

Jawaban :
   Ya, Grammarly mempunyai manfaat bagi perkembangan tulisan saya yaitu dalam hal memeriksa apakah ada typo dalam tulisan saya sehingga kedepannya saya bertekad agar tidak mengulangi kesalahan typo yang sama karena ada rasa senang tersendiri ketika mengecek tulisan saya di Grammarly dan hanya memiliki sedikit kesalahan dengan usaha saya sendiri dalam menerjemahkan kalimat saya satu persatu tanpa
menggunakan google translate untuk seluruh teks saya. Hal tersebut juga
dapat menunjukan seberapa jauh kemampuan saya dalam menulis kalimat
dengan benar sehingga saya akan otomatis mempelajari tentang beberapa
grammar berdasarkan hasil dari Grammarly.

3. Apakah anda keberatan jika setiap menulis dan merevisi tulisan anda
diharuskan menggunakan Grammarly ? Mengapa ?
Jawaban : 
   Tidak, karena Grammarly dapat membantu saya untuk memeriksa
   kesalahan dalam tulisan saya sehingga nilai tulisan saya dan kemampuan
   menerjemahkan bisa meningkat.

4. Apa saran anda terkait penggunaan Grammarly dalam proses self-
revision ?
Jawaban
   Maaf mam, saya belum terpikirkan saran apa yang bisa saya berikan
dikarenakan sejauh ini menurut saya baik-baik saja.
